

Quick Start Guide

Windows & Mac Setup (Windows XP, Vista, 7, 8, 8.1 or Mac 10.6+)

1

Plug the device into your computer's USB 3.0 port (if unavailable, use a USB 2.0 port).

2

Manually launch:

Win: Start > Computer > Unlocker > Unlocker.exe.
Mac: Finder > Unlocker > Unlocker

3

When Device Setup is complete, you can move your important files to the "Secure Files" drive and they will be automatically encrypted.

Some Windows systems prompt to restart after you first plug in your device. You can safely close that prompt without restarting—no new drivers or software are installed.

Warning: Please save password in a secure location as we are not able to recover your password for you.

Password Reset can only be performed on drives managed by IronKey EMS. For more information visit datalocker.com/ems.

*** H300/H350 Enterprise requires an IronKey EMS or SafeConsole license to activate. License sold separately. Please contact your system admin.**
